

TABLE D

Percentages for Calculating Impervious Cover Limit
for a Forested Site under N.J.A.C. 7:7E-5A.9

<u>Development Intensity</u>	<u>Impervious Cover Percentage</u>
<u>High development intensity</u>	<u>70 percent</u>
<u>Medium development intensity</u>	<u>40 percent</u>
<u>Low development intensity</u>	<u>5 percent</u>

TABLE E

Percentages for Calculating the Impervious Cover Limit
for an Unforested Site under N.J.A.C. 7:7E-5A.9

<u>Development Intensity</u>	<u>Impervious Cover Percentage</u>
<u>High development intensity in the urban area region</u>	<u>90 percent</u>
<u>High development intensity not in the urban area region</u>	<u>80 percent</u>
<u>Medium development intensity</u>	<u>40 percent</u>
<u>Low development intensity</u>	<u>5 percent</u>
