

Figure: 10 TAC §80.23(i)(1)

DETERMINING COLUMN LOAD

To determine the column load for Column #1 at the endwall look up Span "A" in the table in §80.23(i)(4). To determine the column load for Column #2, look up the combined distance of both Span "A" and Span "B".

To determine the column load for Column #3 look up Span "B" in the table.

(NOTE: Mating line walls not supporting the beam must be included in the span distance.)

To determine the loads for Columns #4 and #5 look up Span "C". For Columns #6 and #7 look up load for span "D".

MARRIAGE LINE ELEVATION
