Figure: 1 TAC §91.35(f)

Texas Register Formatting for Proposed Rules

Code	Meaning
<p>	To indicate a paragraph *(insert before each paragraph in the preamble)*
<new>	To indicate a new section *(insert before the section number of each proposed new section)*
<etb>	To indicate new language in a proposed amendment* *(insert before the first new word)*
<eti>	To indicate italicized text Examples: titles of books, court cases, referencing the *Texas Register* *(insert before the first word)*
<et>	To return to regular type face *(insert after new language or italicized text)*
[ ]	To indicate old or obsolete language* *(insert old or obsolete language between the square brackets)*
<sup>	For superscripted numbers *(insert before the number)*
</sup>	To return to normal type *(insert after the number)*
<sub>	For subscripted numbers *(insert before the number)*
</sub>	To return to normal type *(insert after the number)*
<*>	To indicate a section symbol (§) *(insert in place of the section symbol)*
*n	To indicate separation of multiple documents in a single file *(insert between each document)*

*You must include the entire word in the coding for new and old language. You can not code only part of the word.
