

Figure: 30 TAC §336.1133

| Constituent or Property   | Maximum<br>(mg/l) | Concentration<br>(pCi/l) |
|---|-------------------|--------------------------|
| Arsenic   | 0.05              |                          |
| Barium  | 1                 |                          |
| Cadmium   | 0.01              |                          |
| Chromium  | 0.05              |                          |
| Lead  | 0.05              |                          |
| Mercury   | 0.002             |                          |
| Selenium  | 0.01              |                          |
| Silver  | 0.05              |                          |
| Endrin 1,2,3,4,10,10-hexachloro-6, 7-<br>exoxy-1,4,4a,5,6,7,8, 8a-octahydro-endo,<br>endo-1,4:5,8-dimethanonaphthalene  | 0.0002            |                          |
| Lindane 1,2,3,4,5,<br>6-hexachlorocyclohexane   | 0.004             |                          |
| Methoxychlor 1,1,1-trichloro-2,2-bis-<br>(p-methoxyphenyl) ethane   | 0.1               |                          |
| Toxaphene Chlorinated camphene  | 0.005             |                          |
| 2,4-D (2,4, 5-Trichlorophenoxy) acetic<br>acid  | 0.1               |                          |
| Silvex 2-(2,4,5-Trichlorophenoxy)<br>propionic acid   | 0.01              |                          |
| Combined radium-226 and radium-228  |                   | 5                        |
| Gross alpha-particle activity (excluding<br>radon and uranium when producing<br>uranium<br>by-product material or radon and thorium<br>when producing thorium by-product<br>material) |                   | 15                       |
