

Table VI. USDA Soil Textural Classifications.

SOIL PARTICLE SIZE:

Clay - Smaller than 0.002 mm in diameter

Silt - 0.05 to 0.002 mm in diameter

Sand - 2.0 to 0.05 mm in diameter

Gravel - Greater than 2.0 mm in diameter

mm = millimeter

Note 1: Sand shall be free of organic matter and shall be composed of silica, quartz, mica, or any other stable mineral.

Note 2: Class Ia soils contain more than 30% gravel; therefore, they are not portrayed on the soil triangle.
